Website Features

Navigation Bar

The navigation bar is located at the top of the webpage and contains links to:

- Home
- Courses
- Contact

It allows users to navigate smoothly between different sections.

Hero Section

The hero section provides:

- A welcoming headline
- A brief description
- "Explore Courses" button

A gradient background is used to improve visual appearance.

Courses Section

The courses section displays three popular courses:

1. Web Development
2. Python Programming
3. Data Science

Each course is displayed using Bootstrap cards and contains:

- Course title
- Short description
- Enroll button

Contact Section

The contact section provides:

- Email address
- Phone number

This allows users to connect with the platform.

Footer

The footer displays:

- Copyright information
- Website ownership details

Working of the Project

1. The user opens the website.
2. The navigation bar provides access to different sections.
3. The hero section introduces the platform.
4. Users can browse available courses.
5. Users can view contact information for further communication.
6. The website remains responsive across devices due to Bootstrap.

Code Explanation

HTML

HTML is used to create:

- Navbar
- Hero section
- Course cards
- Contact section
- Footer

CSS

Custom CSS is used for:

- Gradient hero background
- Hover effects on course cards
- Footer styling
- Spacing and alignment

Bootstrap

Bootstrap classes are used for:

- Responsive containers
- Grid system (row and columns)
- Cards
- Buttons
- Typography and spacing

Conclusion

The LearnHub Online Learning Platform successfully demonstrates the development of a responsive educational website using HTML, CSS, and Bootstrap. The project provides a clean user interface, organized content structure, and responsive design suitable for learners across
